Japan has been moving toward a more independent security policy since the early 2010s, duplicating the military assets of the United States and reorganizing the Self-Defense Forces. In *Japan's Awakening*, Lionel P. Fatton and Oreste Foppiani argue that the country faces an entrapment-abandonment dilemma in which any attempt to prevent abandonment by the United States vis-à-vis China negatively affects its national security by heightening the risk of entrapment in the Korean Peninsula, and vice versa. A move toward autonomy is the only way for Japan to solve this dilemma. The subject is at

variance with both the insistence on the constraining effect of domestic norms on Japan's security policy and the assumption of everlasting reliance on the United States for protection.

Presidential Politics after Woodstock: Exit Right to Hurd Road is a unique narrative on the American electorate's move away from the New Deal and Great Society to the political right after the largest gathering of a new generation of young Americans at a farm in Bethel, New York. Perhaps the apex of the anti-Vietnam War movement, three days of peace, love and music ended in the early morning of August 18, 1969. These youngsters were trying to stop a war and change

the "norms" of society for almost five years. But as they hopped into their vans and muddied cars that took them away from Yasgur's farm many would exit right onto Hurd Road and a slow march to the political right. This book looks back at the political politics that consumed the American electorate from Richard Nixon to Donald Trump.

Neoliberalismo y hermenéuticas de derechos humanos en México y en el MERCOSUR

La obra esboza nociones de sujetos de derechos humanos desde lo gubernamental – específicamente desde los presidencialismos – en América Latina planteando un diálogo/confrontación con el paradigma neoliberal durante la última década del siglo XX y la primera década del siglo XXI a partir de la creación de instituciones de protección y promoción de derechos humanos. Estas hipótesis se sostienen desde una investigación cualitativa, comparativa y descriptiva realizada en México y en los países que conforman el Mercado Común del Sur (MERCOSUR) (en el marco del posgrado

cursado con la beca CLACSO-CONACYT) que incluyó entrevistas a actores clave en el ámbito gubernamental, a representantes de instituciones y a actores de la sociedad civil. Además, presenta unas reflexiones sobre el presente y el futuro (incierto) de los derechos humanos a partir del pasado cercano y desde lo político, con un planteamiento que visibiliza a los derechos desde el ámbito de la disputa en contraste con su dimensión ética, filosófica o jurídica. El autor sostiene, desde una perspectiva sociohistórica y hermenéutica, cómo las instituciones públicas gubernamentales del MERCOSUR y México son creadas por influencia de actores políticos cercanos al poder gubernamental – atravesados por sus dimensiones culturales e ideológicas, algunos neoliberales y otros respondiendo este modelo – con agendas de gobierno que sirven de soporte para generar institucionalidad pública de derechos humanos local, nacional e internacional, construyéndose así una hermenéutica de derechos humanos totalizante que prioriza algunos derechos y deja otros de lado de acuerdo con las agendas políticas de las fuerzas que gobiernan.

Bangladesh: A Suffering People Under State Terrorism explores the destructive political situation in Bangladesh under the one-party and one-person rule of the despotic Sheikh Hasina. The contributors to this edited collection examine the catastrophic political environment of the country in view of the Hasina regime's relentless oppression and repression since 2009, the authoritarian rule of her father in the early 1970s as well as the topic of Indian political, cultural and economic hegemony to which this dictatorial regime is increasingly surrendering Bangladesh's national interest, integrity and sovereignty. The contributors also attempt to expose the wholesale corruption and unprecedented vote-rigging that have rendered the regime completely illegal and illegitimate. They also highlight how the regime has been clinging to power by systemically unleashing terror and tyranny through its widespread networks of state machinery.

The rise of candidate, then president, Donald Trump coincided with a near-total turnover of late-night hosts, as well as the additions of late-night shows in new formats. The result has changed the paradigm of late-night talk show hosting, in which each host or segment must weigh the political leanings of their audiences and their personal convictions as they choose how to poke fun at or pontificate on the issues of the day. The ways each host has navigated this new terrain of outrage and resistance in their comedy offers fascinating insights into hosts' abilities to use new techniques to continue

to inform, inflame, entertain and satirize, all while shaping their audience's knowledge about their world. This volume examines the communication strategies, informed and influenced by their individual experiences, employed by the hosts as they seek to handle Trump and the fast-moving news cycle that trails in his wake. Examining topics as varied as politics as the carnivalesque, race and gender privilege, satire as education and the blurring lines between satire and journalism, this volume provides a starting examination of the rhetoric, humor and political chops these hosts have employed while they use their platforms to inform, entertain or resist.

Employing a novel collaborative transnational methodology, this ground-breaking book presents the first comprehensive and systematic comparison of Mexico and South Africa. Although geographically, historically and diplomatically far apart, Mexico and South Africa are ambitious and influential powers in the Global South and also experience wide-ranging domestic transitions. A binational team of 26 researchers from the two countries, all specialists in

their respective disciplines, probe the transitions that Mexico and South Africa are undergoing in areas such as socio-cultural diversity, domestic politics, economic development, labour dynamics, social and territorial inequality, food security, crime and violence, and foreign relations. The detailed country studies allow the authors to identify striking similarities but also profound differences between the two societies. In so doing, the book helps to explain Mexico and South Africa to each other but also to the world at large.

À l'aune des débats sur la parité en politique, de nombreux travaux scientifiques se sont penchés sur les rapports de genre entre hommes et femmes politiques et sur le caractère souvent masculin du pouvoir. Mais très peu de recherches ont exploré les rapports au genre déployés en dehors des manifestes militants pro ou antiféministes, c'est-à-dire la façon dont le genre peut constituer une grille d'analyse employée – ou non – par chaque citoyen-ne pour décrypter le jeu politique et lui donner sens. Pourtant, analyser les rapports au genre, c'est-à-dire la manière dont les individus –

qu'ils soient élus ou électeurs, cadres administratifs ou journalistes politiques – s'approprient le genre dans leurs discours et leurs actes, permet d'éclairer la fabrique du politique et de renouveler le regard scientifique porté sur celui-ci. Les contributions rassemblées au sein de cet ouvrage montrent combien les rapports au genre peuvent façonner les rapports au politique, à l'engagement militant et à l'action publique. Elles soulignent la diversité des processus par lesquels la politique est perçue, reçue et bâtie, mais aussi les obstacles auxquels se heurte la conduite de l'action publique. Les rapports ambivalents au féminisme ou l'évitement du genre sont autant d'entraves à l'emprise réelle d'injonctions politiques à l'égalité, à la parité ou à la mixité. On saisit mieux, dès lors, tout l'intérêt de se pencher sur les rapports au genre pour appréhender les processus complexes de la fabrique du politique.

The main aim of this book is to evaluate the US foreign policy during the Trump era and its ultra-nationalism within the context of its influence on the major actors and regions at the international level. The authoritarian dimension of the Trump administration's policy will be the supportive element of the framework of this book. The events in the US move very quickly nowadays in terms of Trump's authoritarianism, despite all the natural shortcomings. We hope that this book will serve as a guide to understand Trump's US foreign policy.

In the book, authors from eleven post-communist countries analyse the specific legal and political character of the organs of the control of law constitutionality in post-Soviet states. This is done through explaining the legal and political character of those bodies as well as their place in the system of the state power. The authors also examine tasks assigned to those bodies, the manner of their establishment, the course of their work, the legal force of their decisions and the legal status of their members. In the conclusions, the authors refer to the optimisation of the political status of the organs controlling the constitutionality of law as organs of the protection of the constitution. Research findings, conclusions and recommendations formulated in the book can be applied with a view to changing the mechanisms of the protection of constitutionality in post-Soviet states or presenting lawmakers in other countries with consequences of adopting particular legal solutions.

This collection of papers explores the concept of constitutional identity in theory and with specific reference to Central and Eastern Europe at a time when many countries across but also beyond the region seem to appeal to an identarian rhetoric in order to justify their illiberal political attitudes. Drawing on law, political science, philosophy or sociology, the contributions address salient questions of constitutional and political theory like the understanding of (constitutional) identity in a post-Westphalian legal order, the extent and the stakes of judicial dialogue between national and

supranational (European) judges and the so-called abusive legal transplants. As such, the book also touches upon more general topics such as the rule of law, populism, globalization, legal consciousness and legal culture.

Seán Keating in Context: Responses to Culture and Politics in Post-Civil-War Ireland offers, for the first time, a comprehensive compilation and contextual analysis of Keating's articles and broadcasts between 1924 and 1972. The introduction to the book examines the context of his thoughts on culture, politics, and economics. Moreover, given the present economic conditions in Ireland and further afield, the content of Keating's articles and broadcasts is prophetic, poignant, and amusing. The book is a precursor to the author's forthcoming full-scale monograph on the artist.

This book offers content analyses of the 2016 presidential candidate campaign messages from the primary and the general election. The chapters examine both new (Twitter, Facebook) and traditional (TV spots, debates, speeches) media employed in this contest. This allows comparison of campaign phases (primary versus general), candidates (Republican primary and Democratic primary candidates; general election candidates), and message forms. The results are compared with data from analyses of previous presidential campaigns.

Das Staatenlexikon vermittelt grundlegende Kenntnisse zu Geographie, Kultur, Politik und Wirtschaft der Staatenwelt Europas. In alphabetischer Reihenfolge – von Albanien bis Zypern – werden insgesamt 50 Staaten behandelt. Die Besonderheit des Lexikons besteht in der Analyse gegenwärtiger gesellschaftspolitischer und ökonomischer Entwicklungen als historisch bedingten Prozessen. In kompakter Form werden Informationen auf aktuellem Stand über die Bedingungen und Strukturen, Interessen und Ziele der Politik der Staaten Europas untereinander und in der internationalen

Arena geboten. Zielgruppen sind vor allem Wissenschaftler, Studierende, Dozenten, Journalisten und sonstige Mittler politischer Bildung sowie alle politisch Interessierten. Ein Grundlagenwerk, das zur differenzierten Beurteilung Europas im Wandel beiträgt. Dabei wird der Begriff «Europa» räumlich großzügig interpretiert und auch über Ost- und Südosteuropa hinaus bis zum Kaukasus ausgedehnt.

La médiation internationale est à la fois un art et une science. Cette étude se concentrera sur la médiation politique en tant que moyen de règlement d'un conflit violent, mettant ainsi fin au conflit et en permettant à la tierce partie mandatée d'aider les parties à trouver des structures et des stratégies nouvelles ou de différents mécanismes pour traiter leurs griefs sous-jacents. Sur la base de 5 phases distinctes, le guide tentera d'illustrer et de démontrer les

mécanismes généraux du processus de médiation, démarrant avec le début du processus de médiation jusqu'à l'atteinte d'un résultat satisfaisant et obtenu par le biais de la médiation. Enfin, une étude de cas complexe sur la médiation au Soudan sera utilisée pour valider le modèle de médiation présenté dans ce guide. Enfin, Le manuel se terminera avec des leçons clés tirées du cas et par des réflexions finales d'ensemble. En tant que tel, il est dédié à informer le curieux, à servir en tant que thème de réflexion pour le praticien plus érudit et à stimuler la conception et l'innovation de l'analyste politique pour contribuer à l'établissement d'une épistémologie fondamentale de la médiation.

JOSÉ PASCAL DA ROCHA est médiateur (ONU / OSCE / CEDEAO), professeur (Université Columbia de la ville de New York) et consultant en entreprise (AMA). Il a 20 ans d'expérience internationale dans les domaines du rétablissement de la paix, du maintien de la paix et de la consolidation de la paix et 10 ans d'expérience en entreprise. Ses recherches portent sur la médiation, les conflits armés et la consolidation de la paix.

Starting with 1809, Sweden's 'year zero' and a period of deep national trauma, this book studies the relationship between Sweden and its environment, and foreign policy and overlapping security and defence policies. The book displays the pattern to Swedish foreign policy behavior, at times solidarity and involvement, at times disengagement and isolation, depending on the actions of larger powers in the neighbourhood. The author examines Sweden's independence from, dependence on, orientation towards, and then acquiescence in Europe, and the release of a 'revolution' in Swedish foreign policy from the early 1990s. The author also studies a process of steady Swedish Europeanization and the emergence of a post-neutral stance. The book's endpoint is the European Parliamentary election 2019, which resulted in a stemming of the populist tide in Sweden which had grown from disconnection between a Europe-reluctant electorate and Europe-enthusiastic politicians. The book also looks towards Swedish policy ambitions and prospects for the 2020s and continuation of the 'revolution'.

Cet ouvrage analyse le travail des commissions d'historiens dans les processus de rapprochement en Pologne. Deux d'entre elles sont privilégiées : la commission polono-allemande portant sur les manuels scolaires et le groupe polono-russe sur les questions difficiles. Cette étude se fonde sur deux sources principales : une série d'entretiens et des recherches dans les archives, auxquelles s'ajoutent des ressources complémentaires : observations participantes et analyse de discours politiques, de sondages et de la presse. Le dialogue sur l'histoire auquel

d'aucuns font appel correspond tout à fait à ce qui est demandé aux commissions d'historiens. Dès lors, pourquoi ces commissions ont-elles été créées ? Comment fonctionnent-elles et pourquoi continuent-elles de fonctionner ? Nous formons les hypothèses que, premièrement, ces commissions ont été créées dans un objectif de rapprochement, voire de réconciliation. Deuxièmement, leur fonctionnement — et sa prolongation — dépend de trois variables : le contexte, les mandats, les acteurs. Cet ouvrage s'articule en cinq axes. Les trois premières parties portent sur chacune des trois variables évoquées : contexte, mandats, acteurs. La quatrième partie concerne les sphères d'influence de ces commissions et les débats qu'elles engendrent : politique et religion, débats publics, débats scientifiques. La dernière partie se concentre sur les projets de ces commissions : l'ouvrage commun ou les centres de dialogue du côté polono-russe, le manuel commun d'histoire du côté polono-allemand. Au travers de toutes ces pratiques, les commissions d'historiens cherchent, dans le cadre de la transformation des conflits, à réconcilier par l'histoire, c'est du moins l'un des arguments défendus dans cet ouvrage.

En 2018 la Révolution de velours, pacifique dans son déroulement, amène au pouvoir son leader Nikol Pashinyan, dans un pays qui a déjà parcouru du chemin depuis sa souveraineté en 1991. C'est à cette Arménie que s'intéresse cette monographie : comment se place-t-elle par rapport à la Russie et les puissances occidentales, telles que l'Union européenne (UE) ou l'OTAN, et pourquoi ?

Cette étude débute par une partie introductive sur les relations entre la Russie et l'Occident, le champ politique de l'espace post-soviétique étant

dominé par ces acteurs et les instruments qu'ils proposent aux Nouveaux États indépendants (NEI). Dans un second temps, l'ouvrage s'intéresse aux évolutions et alignements distincts des NEI dans le système international. Ainsi, les votes de l'Arménie à l'Assemblée générale des Nations Unies démontrent une position plus proche de celle de la Russie que de l'UE. Dans ce cadre, une étude des relations russo-arméniennes est proposée dans la troisième partie, afin d'expliquer les choix de politique extérieure de l'Arménie. Enfin, le livre se termine par une réflexion sur une éventuelle exception arménienne dans le Caucase du Sud en matière de coopération avec l'UE et l'OTAN compte tenu de la proximité des relations russo-arméniennes.

This book is the outcome of a multi-annual study of Chinese and European research institutions that addresses the partnership between the EU and China and its political and economic implications. The book's distinct focus is to situate this multipurpose relationship within the context of the multidisciplinary academic debate about China's interregional relations with specific regions (i.e. Europe, South-east Asia, Latin America, Africa, Middle East), notably the Belt and Road initiative (BRI). Both the economic and political dimensions of the international rise of China are critically analysed,

with special attention to opportunities, risks, challenges and controversial issues. The international set of authors uniquely combines academics and decision makers as well as experts and think tank leaders. The collection includes contributions by Mario Telò, Sun Jisheng, Lin Hongyu, Zhao Jiakun, Wei Ling, Uwe Wissenbach, Feng Yuan, Jean-François Di Meglio, Shi Shiwei, Jürgen Rüländ, Fabricio Rodríguez, Sebastian Santander, Wang Jin, Guy Burton, Geoffrey Harris, Jia Ruixia, Zhang Min and Gerald Stahl. "A truly collaborative project combining stimulating contributions from China and Europe that collectively provide a 'one-stop shop' for all those interested in analyzing an ever more complex and important relationship"

This book analyzes current security challenges in Asia (understood in its broader Indo-Pacific sense) with the aim of capturing the major shifts in the balance of power involving regional actors. Through the lenses of IR theory, this book seeks to provide insights into the consequences of the transition of power from the United States to China. The growing power of China and its impact on both neighboring countries and the international system as a whole, as well as its reception by the United

States, have been of key importance to the development of security and international studies. By presenting the case studies of regional security challenges from a multidimensional perspective, this book analyzes both the stages of the maturity of powers and their satisfaction within the existing system.

The discipline of International Relations was invented to solve the problem of war. However, so far, no really encompassing solutions have been found. The solutions that were proposed centered around the establishment of the United Nations and the spread of democratization and globalization. But war continues. Cornelia Beyer believes she has found a missing piece in the peace puzzle: the militaries are not integrated. Integrating the militaries would be an additional solution to abolish war between states completely and also to abolish nuclear weapons. This solution involves

integrating the militaries into one common global alliance, one truly global NATO. Within NATO, war is abolished. Globalising NATO is a historically new thought. Interestingly, all peace proposals in history centre around political or legal integration, but none promoted military integration so far. If all militaries would unite, this would mean an end to war between states. Beyer convinces in this book that military integration into one global NATO could abolish war and help with the abolition of nuclear weapons. She also promotes a global welfare state, financed through taxation on arms races, and an early warning system for war, based on international depression data, for tackling civil wars.

The main purpose of the book is to examine from numerous and distinct, albeit complementary perspectives how logistics feeds into region-building. The angle of approach is to reach resolutely beyond logistical and material aspects of border-crossing in order to tackle cultural, symbolic, identity-based as well as institutional, legal and political dimensions of the contemporary 'pooling' of sovereignties in today's Eurasia. Thus, constitutive chapters of the book draw from analyses as remote as historical, environmental, diplomatic and cybernetic, to mention but a few. Its main conclusions

are that region-building consists largely in concrete changes that affect material aspects of country-to-country dynamics, not just in material-political decisions even if these remain necessary to launch a novel process and to secure it into confidence-building. This blend of logics also involves a multi-scale evolution whereby both local (infra-regional) and regional (supra-national) levels, taken together, make sense. Hence, to probe into one dimension only – the changing nature of borders, both in Europe and Asia, from lines of sovereign divisions to passage-points for exchanges –, induces the bilateral and multi-lateral capacity to 'innovate' within long-term historical givens and to turn nationalistic hostility into dynamics of multiplication of shared exchanges and profits. From a methodological requirement, comparing what seems at first, very different – a fully integrating Europe and a newly co-operative Asia – makes it possible, on the face of it, to uncover and decipher dynamics that are similar in their essence (regional, post-war) even if they differ in details (institutional idiosyncrasies, hurdles).

Der Sammelband präsentiert die Ergebnisse eines Symposiums, das vom 18.–20. Oktober 2018 in Antalya (Türkei) stattfand und von der Akdeniz Universität (Antalya, Türkei), der Trakya Universität (Edirne, Türkei), vom Informationszentrum des Deutschen Akademischen Austauschdienstes – DAAD (Ankara) und von der Konrad-Adenauer-Stiftung Derneği (Ankara) gemeinsam durchgeführt wurde. Anlass war das 300-jährige Jubiläum der deutsch-türkischen Beziehungen. Diese wurden durch ein Schreiben des Osmanischen Sultans an den preußischen König Friedrich Wilhelm I. eingeleitet, die in den dreihundert Jahren in vielfältige Kooperationen und ein militärisches Bündnis mündeten. Auf der dreitägigen Veranstaltung diskutierten Wissenschaftler*innen, Expert*innen sowie Praktiker*innen aus Deutschland und der Türkei über unterschiedliche Bereiche und Kooperationsfelder in Geschichte und Gegenwart. In dem Sammelband behandeln insgesamt 20 Beiträge ein breites Spektrum an Themen und Zeitabschnitten, die neben der politischen, wirtschaftlichen und militärischen Zusammenarbeit aus der Vorrepublikzeit beider Länder auch die Gegenwartsthemen wie das der europäischen Integration und der Migration und Integration aus beidseitiger Perspektive diskutieren.

This book discusses the applicability of Western International Relations (IR) theories to Asia and Africa and the rise of non-Western IR theories (especially in Asia), with case studies focused on the Asia-Pacific, Middle East and Sub-Saharan African regions. Theoretically grounded studies of Asia and Africa are still in high demand, as International Relations scholarship on and in those regions seems underdeveloped in this regard. This is the case both in the application of Western theories in research on Asia and Africa, but especially IR theory-building by scholars in both regions. The book is driven by

the question, whether we need specific Asia and Africa-oriented IR theories to describe, explain and predict developments in regional international relations or can we apply or adapt the so-called Western IR theories.

Examinando ejemplos históricos de prisioneros mantenidos en prisión indefinida durante los conflictos asimétricos y las crisis de seguridad nacional, Hickman desenreda lo presunto de lo aprobado y revela exactamente por qué el encarcelamiento corriente en la base naval infame es tan único y sin precedentes. Ofrece una teoría alternativa que completamente contradice la narrativa inventada por el Gobierno de Bush construyendo su argumento de la historia doméstica e internacional existente: los prisioneros fueron exhibidos como símbolos de victoria militar, castigados como sustitutos

por los arquitectos del 11 de septiembre que quedaban libres, y usados como peones en un paso neoconservador para señalar una nueva política

exterior estadounidense que no hacía caso de las Naciones Unidas, que no respetaba las Convenciones de Ginebra, y que se burlaba de la Corte Criminal Internacional.

Ambient intelligence and the profiling activities authorized by modern technologies oblige us to renew our legislation in different directions. Traditionally, data protection law considers only the relationship between data controllers and data subjects positioned as independent entities. However, in the ambient intelligence reality where profiling activities proliferate, enabled by more and more sophisticated software algorithms, their societal impacts have to be taken into consideration by legislative bodies.

В книге представлены современные мероприятия и проекты из различных областей: экономики, туризма, транспорта, дипломатии, художественных мероприятий, которые относятся к старому Шелковому Пути. Это проекты многих стран, компаний, общественных и международных организаций, а также частных лиц из разных регионов мира. В работе представлен анализ взаимосвязей между этими мероприятиями и проектами. В ней также указаны основные идеи, значения и ценности, на которые они ссылаются и которые они реализуют. «Книга Адама Нобиса "Краткий путеводитель по Новому Шелковому Пути" является важным, интересным и нужным

проектом. Важным, так как он затрагивает проблемы, практические признаки, которые мы можем наблюдать в событиях, происходящих вокруг нас, в реальном социокультурном мире. Интересным, так как способ представления этих вопросов является оригинальным, а кроме того также показывает синтетические и аналитические тенденции. Нужным, так как дает читателю возможность ознакомления с множеством подробной информации по вопросу описываемого явления». Focusing on peacebuilding, this book emphasizes how “grassroots” peacebuilding efforts contribute to closing the gap between the Israeli and Palestinian national communities that have been in conflict for decades. The analysis is undertaken at the individual, pair, and entity levels. The book explores how those involved at each level view the relationship with the other and act to bring about coexistence, a shared society, or peace in a sustained way amid major challenges and an uncertain future. A strong argument is to cultivate and embrace “the habits of peace,” mainly wider perspective,

long-term view, compassion, dialogue, forgiveness, nonviolence, and reconciliation. An open letter to Palestinians and Israelis concludes the book, urging them to reconsider their ways and imagine a better tomorrow for themselves and future generations.

The book analyses contemporary relations between two biggest states in East-Central Europe: Poland and Ukraine. This topic is of interest for three reasons: difficult history of the two countries, different models of development adopted after the end of communism and the common challenge of aggressive Russian policy. The timeframe of the work is from 1989-2018, with an emphasis on the period after 2014, when the Russian-Ukrainian war began. The book is divided into three parts. The first part discusses the history and determinants of Polish-Ukrainian relations. The second

one presents political, economic, social and military relations between the two states. The last part focuses on more specific issues such as historical memory, the Polish-Ukrainian border and relations with the EU.

At the beginning of the 21st century, there are an increasing number of states in which elections do not meet the standards of liberal democracy due to electoral malpractices. The analysis of the malpractices at all stages of the electoral cycle and their impact on the political regime is the primary objective of this book. The research focuses on Turkey. However, the authors move one step further and try to present the Turkish case from a comparative perspective. They analyse selected countries in Central Europe, the Balkans and Latin America. They investigate an interesting process of mutual

reinforcement of increasingly serious electoral malpractices and change in/of the political regime. It leads to the development of 'borderline regimes' balancing between two types of political regimes.

This book thematically analyses and surveys areas of Caribbean history and society. The work is divided into three parts: part one addresses migration and identity; part two explores policy and development; and part three explores music and literature. The volume places a fresh perspective on these topics. The essays depart from the usual broader themes of politics, economics and society and provide a deeper insight into forces that left a decisive legacy on aspects

of the Caribbean region. Such contributions come at a time when some of the Caribbean territories are marking over 50 years as independent nation states and attempting to create, understand and forge ways of dealing with critical national and regional issues. The volume brings together a broad group of scholars writing on Caribbean issues including postgraduate students, lecturers, and researchers. Each chapter is thematically divided into the aforementioned areas. This book addresses areas much deeper than the linear historical and social science models, and it offers Caribbean academics and researchers a foundation for further research.

JEROME TEELUCKSINGH is Lecturer in the Department of History at The University of the West Indies, St. Augustine Campus, Trinidad. He has presented papers at academic conferences, published book chapters and refereed journal articles on migration, Indians in Trinidad, trade unions and migration.

SHANE PANTIN is an attorney-at-law and graduate of the Department of History and Faculty of Law at the University of the West Indies, St. Augustine Campus, Trinidad. His areas of interest include Caribbean history, legal history and international law.

This inaugural volume in the Peter Lang Conflict and Peace series brings together works that richly depict the tensions between the promise and reality of applying communication principles and theories to conflict transformation and peacebuilding around the world and in the United States. Each chapter provides concrete examples of the doing of engaged scholarship in this context. Chapter contributors explain how their on-the-ground work has contributed to theorizing in communication and beyond as well as to conflict transformation and peacebuilding practice. Importantly, they

also unearth the challenges in designing and implementing techniques and practices. As a collection, this edited volume underscores the communicative nature of conflict transformation and peacebuilding in particular, and engaged scholarship, in general. The collection also reveals tensions in doing engaged scholarship that are applicable to other contexts beyond conflict transformation and peacebuilding.

Current neoliberal social and economic realities have had enormous impacts on the abilities of oppressed groups and marginalized communities to realize resistance and innate resiliencies. How does the ubiquity of neoliberal economic forces exacerbate traumatized populations' helplessness, and, thereby, influence their inability to grapple with their oppressors and engage in fruitful change solutions? This edited volume asks how nonviolent conflict practitioners might intervene to 'treat' traumatized, and often marginalized, populations suspended in the predicament of 'acting

in' and 'acting out' their collective traumas. Treating trauma is an integral aspect of successful peacebuilding work. This work aims to explore the role of trauma in peacebuilding and illuminate the ways that neoliberal marginalization impacts trauma-informed peace work.

Understanding Peace Holistically: From the Spiritual to the Political argues that spiritually rooted and morally oriented peacefulness is relevant to the socio-economic-political structures that provide the conditions for a culture of peace. As the authors build up a theory of peace from the spiritual to the relational and communal towards the socio-political, this book also identifies key principles that characterise international and institutional processes that nurture peace. The holistic conception of peace developed in this book may guide and inspire individuals, institutions, and international

organisations with regards to how to make peace.

This book provides a fact-filled overview of the problem of political violence and what is being done to ameliorate it. The book presents extensive data about wars that have taken place since 1991, including information on what started and stopped them, the actions being taken to reduce the extent of armed conflict in the world, and the organisations that conduct and fund peacebuilding operations and research. Those interested in stopping or preventing wars will see how wars ended and what caused them to stop. Peacebuilders, funders and researchers will find an extensive cata-

logue of organisations with similar interests with which they can collaborate. Scholars and teachers will find the book as a helpful resource for courses on political violence.

Este libro recoge las contribuciones realizadas al Seminario Doctoral sobre *Paz y valores europeos como posible modelo de integración y progreso en un mundo global* organizado en el Real Monasterio de Yuste, sede de la Fundación Academia Europea e Iberoamericana de Yuste, en Cuacos de Yuste, España, entre el 24 y 26 de julio de 2017. Los contenidos de este volumen cubren diferentes áreas de investigación, entre las cuales se observan las líneas propuestas en el título, a saber, el modelo y los valores europeos en un mundo global. Una mayoría de artículos se articulan en torno a las

políticas internas de la UE; la propia génesis de los valores Europeos; el papel de las becas Erasmus en la internacionalización de la educación superior; la participación juvenil en el Derecho de la UE; los derechos religiosos en la UE; la preservación de las fronteras exteriores; la política de memoria histórica de la UE; la proyección exterior; o el concepto de Europa desde una visión crítica periférica. This book includes the contributions to the Doctoral Seminar on *Peace and European Values as a potential model for integration and progress in a global world* held at the Royal Monastery of Yuste, Headquarters of the European and Ibero-American Academy of Yuste Foundation, in Cuacos de Yuste, Spain from 24th to 26th July 2017. The contents of this volume cover different areas of research, among which we find the lines proposed in its title, namely the European model and values in a global world. Most are articulated around the EU's internal policies like the genesis of European values; the role of the Erasmus scholarships in the internationalization of higher education; the youth participation in EU Law; religious rights in the EU; the safeguarding of the external borders; the EU's policies of historical memory; the EU's external projection the narrative of what Europe is about from a critical peripheral view.

Albert Einstein was one of the initiators of the peace movement in Europe in the early twentieth century. He tirelessly denounced the imperfections of society due to the primitive institution of war and devoted his energies to outlawing war. After Hitler's rise to power, he abandoned pacifism and instead embraced a federalist vision according to which the root cause of war lies in the division of the world into sovereign states and the vehicle of peace is world government. This book explores Einstein's outlook on war and peace and traces the evolution of his thinking on these topics. In particular,

Einstein developed a dialogue on war and peace with physicists like Bohr, Planck and Szilard as well intellectuals like Dewey, Freud, Gandhi, Mann, Mumford, Rolland Russell, Schweitzer and Tagore. The key concepts that were the focus of these discussions were the cause of war (included the Einstein–Freud debate on psychological and political causes of war) and the means to prevent it; the distinction between antimilitarism, pacifism, internationalism and federalism; and the dividing line between intergovernmental and supranational organizations.

The theoretical goal of the research presented in this book was to include elements of social network analysis into the classical neo-institutional theories of the government coalition formation process. The empirical goal was to verify the benefits and accuracy of this modified analytical model in the analysis of three deviant government coalition formation cases: in Canada (2008), Great Britain (2010) and New Zealand (2017). The authors reconstruct the institutional

framework and visualise the networks of connections between main actors. They argue that the transition from a stable configuration of a two-party system to a multi-party system that is extraneous for the political tradition of these democracies has significantly influenced the process of government coalition formation and cabinets appointment.

Three Tropes on Trump: A Textbook on Applied Marxism, Semiotics, and Psychoanalysis uses the term “trope” in an unusual way—not as an expression in a figurative sense but as a form or method of analysis. This book uses Marxist theory, semiotic theory, and psychoanalytic theory in an attempt to understand what we might call the Trump phenomenon and the Trump style. Each chapter features a primer on its methodology, and it applies concepts from these theories to Trump’s candidacy and presidency, covering everything from his hair style, his use of spectacle, his use of insults, his com-

edic aspects, his personality, and his many psychological problems to help make sense of Trump and his relationship to his base and to the American public.

Trump’s Followers: A Socio-Semiotic Analysis uses semiotic theory, psychoanalytic theory, and sociological theory to analyze Donald Trump’s followers and to understand what motivates them and explain why they behave the way they do when at his rallies. It makes use of ideas from Gustave Le Bon’s classic *The Crowd*, ideas from Freud about the psyche and social groups, and works by many other important scholars and writers. The book is written in an accessible style and is illustrated with many drawings by the author.

La question controversée de la sécession retient peu l’attention des spécialistes du fédéralisme. Les meilleures études fédérales soit l’éluent, soit l’évacuent en quelques lignes. Pourtant, la problématique de la sécession est bien présente dans l’histoire des fédérations. Cet ouvrage est l’un des premiers à explorer le lien complexe entre fédéralisme et sécession. Tout en reconnaissant le potentiel de ce système politique à gérer sous un même gouvernement et d’une manière équilibrée et relativement harmonieuse les relations entre États, peuples, nations ou

territoires différents, les auteurs relèvent les risques d’échec de l’idée fédérale dans les contextes politiques où le principe de la souveraineté partagée est mis à mal. Si plusieurs histoires à succès (les États-Unis, la Suisse, l’Allemagne, etc.) peuvent être identifiées, permettant ainsi de souligner les mérites de la formule fédérale, il ne faut pas toutefois taire ses échecs (l’ex-Yougoslavie, ou plus récemment le Brexit), ou ses demi-échecs. Considérant ainsi les turbulences qu’ont dû traverser ces dernières années des systèmes dévolutifs (Royaume-Uni avec l’Écosse, l’Espagne avec la Catalogne) ou fédératifs (Canada avec le Québec), cet ouvrage dresse un portrait nuancé de la question et pose les bases en vue d’un questionnement du legs encore trop fragile des grands penseurs de la pensée fédérale.

The current crisis of the international order cannot be referred only to the liberal concept of globalisation. It is also a crisis of a certain model and ideas of order, which – as a result of the financial and migration crisis in Europe – were invalidated by reality and must be reconsidered. The aim of this book is to present how contemporary European states attempt to be active actors, responding to the crisis of the international order, in divergent and sometimes contradictory ways. This phenomenon inevitably leads to the undermining of many existing cooperation mechanisms, but on the other hand, it also reveals the limitations in terms of the state actions.

The authors of the book examine the phenomenon of crisis from the perspective of political and economic science. The texts of the book are focused on four aspects of the crisis: (1) the development problem, (2) the structural problem, (3) the management problem and (4) the problem of the weakening legitimacy of a specific crisis-stricken system. This book offers a proposal for a methodological approach to the evaluation of crisis reality and to research on the ways of overcoming the crisis by state authorities. The four proposed aspects of the analysis are an attempt to view the crisis from

various perspectives, which are interrelated and not always clearly separable.

Das Verhältnis Großbritanniens zu Europa lässt sich spätestens seit dem Beitritt des UKs zur damaligen EG 1973 als turbulent bezeichnen. Das britische Misstrauen gegen europäische Institutionen gipfelte im Juni 2016 in einem auch durch Teile der britischen Printmedien initiierten Referendum über die weitere EU-Mitgliedschaft Großbritanniens. Im Mittelpunkt der Untersuchung steht die Frage, welchen Beitrag die Medien

zum Referendumsausgang geleistet haben. Der Autor ordnet die analysierte Berichterstattung von fünf untersuchten Tageszeitungen während der Referendumskampagne in das Erscheinungsbild Großbritanniens im Rahmen seiner wechselvollen europäischen Integrationsgeschichte ein und zeigt auf, wie einzelne, vor allem konservative, Medienhäuser mit ihren Publikationen die Debatte um das Für und Wider eines britischen EU-Verbleibs entscheidend mitgeprägt haben.

The agenda of the 11th CEE Forum Conference in Bratislava, Slovakia, held on 25-26 April 2019 was focused on the reassessment of the Central and Eastern European position in Europe and in the world, seeking for the specificities of this region, being often perceived as a double periphery – of the West and of the East. Since thirty years have passed since the disintegration of the bipolar world, the time has come for a critical reconsideration of the earlier scholarly findings or commonplaces and the formulation of more nuanced and refined conclusions. The selection of papers offered by the organizers in this volume provides an up-to-date view of the CEE region and issues and problems shared by the CEE countries

The European Capital of Culture is one of the European Union's most important cultural programmes, its significance transcending a narrow understanding of the cultural sphere. The scheme has been one of the foremost mechanisms contributing to the urban revival of European cities and increasingly close integration in many areas of social and cultural activity. The ECOC 2016 competition (2007-2011), entered by 11 Polish cities, took place in an exceptionally favourable context. The ECOC 2016 competition in Poland served as an impetus for many changes to take place in the partici-

pant cities. These particularly applied to the sociocultural sphere, encompassing such issues as a city's identity and social capital. Consequently, it became possible to create new urban narratives which also

contributed to changes regarding the cities' images. In some cases, this could even be described as a real revolution which was able to take place as a result of unprecedented social mobilisation.

The book attempts to assess the role of three economic areas in creating power in international relations, i.e. energy sector, internationalization of currency and technologies with a military significance, which might potentially become "fuel for dominance" and an instrument to gain geopolitical advantages of great powers. The book focuses on the policies of chosen countries (USA, China, Germany, and Russia) as well as the European Union in these three economic areas. The purpose is to research the manner and conditions in which the above-mentioned policies can cause the power to grow.

While anti-European forces are still raging, pro-Europeans seem impotent and deprived of a strong, clear and convincing alternative. This book is an attempt to fill that void: reacting to the anti-European wave, it also outlines a strong criticism both of the current EU and of its advocates. Far from the Europeanist defence of the status quo, it proposes an original and radical project of European sovereignty. Its message is both critical and propositional. This book is therefore original in its method, approach and content. It distinguishes itself from most of the literature on the subject by going

beyond the narrow cleavage opposing mainstream anti- and pro-Europeans. In this general polemic, anti-European arguments usually promote a return to sovereignty at the national level, while pro-Europeans justify the existing EU configuration and its so-called "sharing"

or “division” of sovereignty. Despite being clearly in favour of a deeper European integration in some fields, Sophie Heine refuses to throw away the classical concept of sovereign power. Relying on a rich literature and deploying a theoretical and strategic argument, she proposes to rehabilitate this notion at a supra-national level while avoiding the common traps of national sovereignty. This allows her to propose a re-definition of European federalism connected to her broader liberal approach.

The Great Disruption: Understanding the Populist Forces Behind Trump, Brexit, and LePen aims to put the shocking events of 2016–17 into a long-term, historical perspective. The seemingly disparate and separately discussed election of Donald Trump, Brexit vote, success of Marine LePen’s National Front Party, and the wider spread of populism have an overlooked commonality: They all start with a similar core constituency of disaffected older blue collar workers. Using a data-driven analysis, author Anil Hira shows that racism and xenophobia are linked to economic populism—xenophobia be-

coming widespread under conditions of economic stress. Hira shows further that since economic stress is felt very deeply, conventional solutions are inadequate. There is a perception among the affected group that politicians can not offer “normal” solutions and thus turn to populism. *The Great Disruption* traces long-term and largely un-linked shifts in the economy from globalization to automation to uncover the deeper sources of populist outbreaks. This book demonstrates that racial and immigrant attitudes have not changed, rather any backlash is a scapegoating effect of economic loss and dislocation. Populism not only misdiagnoses the situation but also misses the wider long-term threats of climate change, demographic shifts, and the rise of China. Recognizing the transformational nature of such threats depends on the maturation of the Millennial generation and its willingness to evolve towards a more global style of governance, in the process rejecting the shallow promises of populism.

The importance of local authorities in modern states continues to grow regarding service delivery and policy-making. As the role of local authorities has grown, so has the prestige and importance of the top manager positions at the local level. Traditionally, women’s advancement into these top-echelon positions has been much slower than into positions at the lower levels of local government. So how and when do women get hired into these positions? Is their career advancement similar to that of their male peers, or are there notable differences between the sexes? And are women really only

hired as change agents during times of crisis? The author provides answers to these questions and more by focusing on the career advancement of Icelandic female council managers. The book draws from both comparative resources and a single case study on Iceland and provides comprehensive information on the recruitment of women into the position of council manager from the perspective of local government studies, organizational studies and gender studies. The book will help scholars, students and practitioners interested in exploring the subtle hindrances facing women’s advancement into top-echelon positions in organizations.

The Darfur conflict began in February 2003 and became the ‘World’s Worst Humanitarian Crisis’ according to the U.N. records. The international community has been slow to respond to the crisis in Darfur. The U.N. Commission of Inquiry in Darfur concluded that the atrocities amounted to ‘war crimes’ and ‘crimes against humanity’ and the Human Rights Watch supported this. Conversely, the U.S. government declared that ‘genocide’ was indeed committed in Darfur. This sentiment was supported by the European Union, Germany and Canada. The role

of the international community in Darfur is of great significance because, as the twentieth century proves, the absence of punitive measures against the perpetrators, the ignorance of victims and the forgetfulness of such crimes facilitate the path for genocides to happen again.

In this book, the relations and policies of global and regional powers, especially in the recent period, and the problems and issues that are important at international platform are discussed. While it is a stereotypical discourse to state that everything in world politics affects another, its truthfulness reflects an undeniable reality. In this context, an up-to-date and holistic approach has been attempted to analyze the relations of the global and regional actors and the important problems and issues in the current period.

The book aims to answer the central question: "What went wrong, more precisely, in the decision chain during the reconstruction of Iraq's military institution?" The holistic character of the approach is ensured through a series of background analyses. Although most researches concluded already that Iraq's reconstruction was a failure, answering the question implied the design of an appropriate research method and data collection/analysis, in order to frame particular characteristics of the reconstruction process. Despite the complexity of the topic and theoretical Security Sector

Reform principles, which can hardly be applied to Iraq's case, the thesis emphasizes on actors involved, their actions and connections between events, as part of a unique process.

In the final decades of the 20th century, a confluence of factors precipitated a policy change in the criminal justice arena that led to unprecedented growth. This growth translated into the criminalization, sentencing and incarceration of tens of thousands of marginalized people in the United States. These factors are considered in *Behind American Prison Policy and Population Growth: An Inside Account*. Tales are told of the increased prison population that necessitated a continuous unfolding of prison construction projects, rehabbing abandoned state hospitals and private prisons, all with the

aim of more and more secure accommodations. During this time, the author was a participant/observer at all correctional security levels, treatment and medical facilities and personnel training in this system. His roles over the years included increased responsibility and regular direct contact with incarcerated individuals in on-the-line or line supervisor positions. The narrative is enhanced by the author's background as social science scholar. This is a unique perspective, documenting a historic upturn in long-term detention addressing crime and disorder. These overarching realities produced struggle across all participants, including clients, staff, consultants and visitors. Their stories of being swept up in the constant demand for increasing capacity offer compelling background to the consequences of visceral responses guiding criminal justice.

The book is devoted to relations between the ethnic diversity and the quality of governance at the local level. Opolskie province in Poland is a case for explaining this interdependence. That is because of its history of multiculturalism and the present state of its ethnic diversity. The important feature of this region is, that nearly half of the communes is ethnically homogenous when the rest is ethnically diversified with a strong position of German and Silesian minorities. The preliminary assumption was, that the quality of governance would be higher in communes characterized by ethnic

diversity. On the basis of the nested analysis method, authors conducted quantitative and qualitative analysis.

The book aims to analyze Turkish-American relations. In order to improve its consistency and reliability, the volume is based on a chronological and thematic study of Turkish-American relations. Meticulous consideration has been given to the categorization and presentation of the contributions in order to ensure that the study operates in a relative manner, and the topic is categorized and narrowed down suitably. For this purpose, the volume is divided into three main parts and it maintains that each section's contribution retains analytical cogency and descriptive relevancy

to the preceding sections. The book is prepared as a reference work as a collection of unpublished original chapters. It provides an insight into the widely discussed but not carefully analyzed topic by examining different aspects of Turkish-American relations from a historical point of view. It aims to analyze the roots of the Turkish-American relations and the direction in which they are going. It focuses on the political, economic, social, identity, and security interaction between the two ac-

tors. In this way, it aims to contribute to the scholarly literature in this field with original chapters on selected themes, especially in these unsettling and interesting times.

Donald J. Trump ran on a platform that, among other things, promised to “drain the swamp” that is Washington, DC. Part of that draining would entail what his chief strategist, Steve Bannon, would call “the deconstruction of the administrative state.” Set in the political environment of 2020, with a raging pandemic and nationwide protests, this work examines the philosophy that guides the Trump Administration’s approach and the mechanisms by which it seeks to accomplish the deconstruction. By combining journalistic accounts with presidential and public administra-

tion scholarship, the book raises questions about the impact of Trump’s approach on the future of public administration. As such, this work makes a strong contribution to public administration and presidential studies and casts a scholarly light on treatments of Trump’s contribution to governance and politics.

This book gives a sheer framework for the Turkish story of transition in politics, society, and foreign affairs during the Justice and Development Party era. This book expands upon transitions in political and societal fabric of the country together with its eventual reorientation of foreign policy in broader regional and global contexts. The themes covered in this book are not only placed in a historical context but also provide an analytical insight into the 2000s. The individual chapters may be read in isolation. Readers

who are interested in Turkish politics and foreign policy can find this book an easy read and gain a detailed understanding of the current state of art. This book serves as a supplementary course book at undergraduate and graduate levels in the fields of political science and international relations, and Turkish politics.

With the establishment of the EU, the goals and policies pursued through European Communities, and the targets and policies covered by new action areas, which include Economic and Monetary Union, European Citizenship, Common Security and Foreign Policy which will be progressed gradually by European Union treaty, have started to be addressed as a whole. The identity of the EU at the global level has also experienced change. In this context, the EU represents a political structure on its own, with its institutions, activities and authority, which constitute a supranational structure.

Of course, it is not possible to say that this process continues without any problems and disputes. However, when we look at the development process of the EU, it is seen that this change and the transformation continue in the context of the requirements and the process continues dynamically. In this context, this study includes other studies discussing the developments of the EU in different policy spaces. In these studies, it has been examined whether EU policies have an impact on national structures, practices and actors and if there is, how and under what conditions this has become clear.

If we want to understand the vicissitudes of modern democracy then, argues the author, we need to analyse the ideas upon which representative government is based rather than compare contemporary conditions with the Greek ideal. These principal ideas have been presented clearly in past centuries, when the relation between democracy and representation was still a matter of political judgement. The old masters of political thinking clarified the functions of representation: legitimising power, creating sovereignty but also setting its limits, and pursuing the common good while still

reflecting social diversity. Because institutions of representation are expected to fulfil a variety of functions, these institutions have in recent times come under attack for standing in the way of radical programs for democratising democracy. The author of this book reminds us that these functions are necessary in every political order, whether democratic or not. Instead of rejecting representation, political theorists should focus on making government more accountable.

This study turned the tables on a conventional understanding of the four instruments of national power (diplomacy, information, military and economic measures/D.I.M.E.) to see how potential adversaries could use these against the national security interests of Canada and the United States. Moreover, this particular work focuses on qualitative research regarding cyber threats that have continually beleaguered these nations by malevolent actors mostly over the last five years. This study also affords consideration to how nefarious individuals, non-state actors, or nation states can im-

plement the instruments of national power through the application of a new model named the York Intelligence Red Team Model-Cyber (YIRTM-C) using sources guided by the Federal Qualitative Secondary Data Case Study Triangulation Model to arrive at results.

In *Stalin's Soviet Monastery* Russian scholar Jim Curtis integrates innovative work in linguistics, anthropology, and media theory to develop a holistic analysis of Russian society that includes a theoretically based rationale for ignoring ideology in favor of cultural dynamics. While the young Iosif Djughashvili, later known as Joseph Stalin, was studying to be a priest in an Orthodox seminary, he took on the role that defined his political career, that of a sadistic elder who imposed fiendish vows of poverty, chastity, and obedience on hapless Soviet citizens.

As an exercise in historical anthropology, *Stalin's Soviet Monastery* emphasizes the role of myth and ritual in Russia, a society with strong residual orality. The imitation of Christ is called passion-suffering, a practice that helps to explain the widespread acquiescence to Stalin's practices. Stalin was intensely interested in literature, and his favorite author was Fyodor Dostoyevsky. Some passages in Dostoyevsky's work anticipate key features of Stalinism. An Afterword discusses the development of Russian society after the collapse of the Soviet Union in 1991.

Like all empires, the Soviet Empire was also based on the distinction centre–periphery. Although the Soviet Empire no longer exists, relationships between centres and peripheries still shape realities in the region. The book analyses the relevance of this distinction for the understanding of political, economic, and cultural realities in the post-Soviet space. Case studies provided by scholars from different countries of the former Soviet Union explore the potential

of the distinction in historical as well as in economic and political perspectives.

Das Buch untersucht den Aufbau einer interregionalen Partnerschaft zwischen der Europäischen Union (EU) und den Ländern Zentralasiens. Fragen nach der Akteursqualität und Wirkung der externen Governance der EU in Zentralasien, den sicherheits- und machtpolitischen Gegebenheiten und den Aussichten des EU-Engagements in der Region stehen im Zentrum der Analyse. Ausgangspunkte für die Überlegungen zur Theorie sind die Rolle der EU in der Global Governance und im Interregionalismus. Auf dieser Grundlage formuliert der Autor Arbeitshypothesen, deren Erklärungskraft im

empirischen Teil in vier ausgewählten Policy-Bereichen überprüft wird.

Navarra war im Mittelalter durch Zwistigkeiten verschiedener Adelsparteien geprägt. Diese führten letztendlich zum Niedergang des Königreichs. 1512 eroberte Ferdinand II. von Aragon Navarra. Der Gründer des baskischen Nationalismus, Sabino Arana, entwarf Ende des 19. Jahrhunderts den zukünftigen baskischen Staat. Die Zugehörigkeit des Baskenlands zu Navarra unter Sancho III. (1000–1035) veranlasste Arana, Navarra in seine Staatskonstruktion aufzunehmen. Noch heute gilt Navarra unter baskischen Nationalisten als »Wiege der baskischen Nation«. Navarrismus, Baskismus und

Españolismus nehmen jeweils unterschiedliche Aspekte der langen Geschichte der Region für sich und ihre Ideologie mythologisierend in Anspruch. Die vorliegende Publikation unterzieht die Entwicklung Navarras mithilfe quantitativer Methoden einer politikwissenschaftlich-historischen Analyse und strebt an, die politische Zukunft Navarras zwischen Navarrismus, Españolismus und Baskismus zu bestimmen.

Die zwanzig demokratietheoretisch und sozialgeschichtlich orientierten Essays eröffnen Zugänge zu fünf ambivalent angelegten Dimensionen bürgerlicher Mentalität. Dabei werden Konturen eines Bürgertums sichtbar, das sich auf die nie endende Suche nach einer Balance zwischen den Polen Bourgeois und Citoyen, Egoismus und Gemeinwohl, Elite und Masse, Konsens und Dissens, Selbst und Kontingenz begeben hat und an den Variationen eines verkürzten Begriffs von Autonomie und Freiheit laboriert. Die Essays erkunden die nachhaltig destabilisierende Wirkung, die davon auf

Institutionen und Prozeduren von Demokratie ausgeht, indem uns das Bürgertum die Problematik restriktiver Identitätsdefinitionen in Form einer impliziten Strukturierung unseres politischen Bewusstseins hinterlassen hat.

This four-part multidisciplinary volume linearly engages with Zimbabwe's not too distant past and present socio-economic and political situation to 2017. It traces, explores, and analyzes the proceedings and internal mechanisms of the country's state of crisis via eclectic lens to primarily argue that, while during the colonial era some western governments were, and could indeed be implicated and held complicit for the negative developments in the country, post-independence, particularly from 1997 to 2017, Zimbabweans must objectively, individually and collectively introspect

and take responsibility for some of the crisis. Part 2 consequently examines and paradoxically, both commends and condemns the agency of both the then Mugabe-led government and those Zimbabweans who refused to be victims and devised strategies to survive the crisis, albeit, at times, by victimizing others. Part 3 scrutinizes the highs and lows of

the crisis by focusing on some of the prominent personalities of the crisis period covered. It premises that as a result of the November intervention by the military, the crisis had by 2017 reached a watershed, one that could either abate or exacerbate the crisis after Zimbabwe's elections in 2018. Despite the uncertainty which lay ahead, Part 4 audaciously and optimistically, proffers and charts prospective paths and possibilities which are open to the country as it faces the future.

Thirty years have passed since in 1987 formal democratization was achieved in South Korea. Since then the country has undergone the two turnover test (Huntington), and it overcame economic, financial, and political crises. However, social inequality is higher than before democratization, social conflict has been exacerbating, and political polarization has been on the rise. South Korea's democracy has been going through a continuous stress test trying the polity's capacity to heal social conflict, integrate society, and mature politics as meeting these challenges is key to sustainable consolidation

of democracy. The chapters of this edited volume, written by experts from South Korea and Germany in respective fields, examine the way in which South Korea has coped with these challenges in its political system, political economy, and political society since its transition to formal democracy, and provide a focused critical assessment of three decades after democratization.

Es ist ein altbekannter Mechanismus, dass insbesondere in Krisenzeiten das Vertrauen in bewährte Institutionen schwindet. Dies gilt auch für die Europäische Union, deren Zusammenhalt und Aufnahmefähigkeit in diesen Tagen mehr denn je in Frage steht. Gegenstand des Buches ist die Untersuchung der potenziellen Auswirkungen der Ost-Erweiterungen auf die Handlungsfähigkeit der EU. Wie gestaltet sich nach Aufnahme der neuen Mitgliedstaaten die Entscheidungsfindung im Ministerrat sowie im Europäischen Rat, also in den Institutionen, die als Hauptinstanz für die

Vertretung nationaler Interessen gelten? Und wie funktionieren nach der jüngsten Vertragsreform von Lissabon die Abläufe im interinstitutionellen Kompetenz- und Entscheidungsgefüge? Ist der Europäischen Union der Spagat zwischen der Erweiterung nach Mittel- und Ost-Europa und der Wahrung ihrer ‚Capacity‘ (auch mit Blick auf die vollzogenen institutionellen Reformen) gelungen? Diese Fragestellungen beantwortet die Autorin anhand von zwei Fallstudien zu den Verhandlungen um den EU-Haushalt.

Der Autor nimmt die Gedenkveranstaltung am 7. April 2019 zum 25. Jahrestag des Beginns des ruandischen Völkermords zum Anlass, die Geschehnisse im Gebiet der Großen Seen Afrikas zu bilanzieren. Ein bisher Top Secret gehaltener Sonderbericht der Anklagebehörde des Arusha-Gerichts vom 1. Oktober 2003, der 2018 in Frankreich ans Licht gekommen ist, stellt wesentliche Aussagen des offiziellen Narrativs in Frage. Insbesondere die Verantwortung für den Abschuss der ruandischen Präsidentenmaschine am 6. April 1994 bedarf einer unab-

hängigen Untersuchung. Denn das Attentat hat 1994 zwei parallel verlaufende Völkermorde in Ruanda ausgelöst. Der Autor appelliert an die internationale Gemeinschaft, der historischen Wahrheit Raum zu geben und eine demokratische Entwicklung in Ruanda und der DR Kongo zu ermöglichen.

The main theme of the book are transformations of the world community at the political level and at the level of the international institutions. The book explores the currently precarious state of an emerging multipolar world at the time of the peaceful rise of China. It starts with the basic political and geopolitical features, followed by a discussion on norms, values and institutions of the organized international community, and the potential of international law in the face of political instability and crises. The rise of China is discussed in its various aspects: economic and political, with

particular regard to the recent turning of China outward, the Belt and Road Initiative and its evolving cooperation with the European Union. The third part of the book is devoted to development as seen from the perspective of the United Nations and the evolving conceptualization of development. In the final chapters emphasis is placed on the issues of multilateralism and the basic precepts for the future peaceful transformation of the world. There exist different types and sources of state legitimacy and different development models that can co-exist and co-evolve. Significantly, such a transformation requires respect for the fundamentals of international law, in particular sovereignty of states. Building new or reforming existing international institutions is possible only on this basis. This book could be used in courses on international relations and law at universities in all countries, either as a basic or a supplementary source. It would be also useful to journalists and researchers.

Diversitas

Alain-G. Gagnon

The aim of this series is to study diversity by privileging an interdisciplinary approach, through political, legal, cultural and social frameworks. The proposed method of inquiry will be to appeal, at once, to the fields of political philosophy, law, political science, history and sociology. In a period characterized by the increasing diversity of contemporary societies, the authors published in this series will explore avenues for the accommodation and management of pluralism and identity. Such studies will not be limited to assessments of federal states, but will include states that are on the path to federalization as well as non-federal states. Serious efforts will be undertaken to enrich our comprehension of so-called nations without states, most notably Catalonia, Scotland, Flanders and Quebec. A point of emphasis will also be placed on extracting lessons from experiences with civil law relative to those cases marked by the common law tradition. Monist and competing models will be compared in order to assess the relative capacity of each model to provide responses to the question of political instability, while pursuing the quest for justice in minority societies. The series also addresses the place of cities in the management of diversity, as well as the question of migration more generally and the issue of communities characterized by overlapping and hybrid identities. A profound sensitivity to historical narratives is also expected to enrich the proposed scientific approach. Finally, the works published in this series will reveal a common aspiration to advance social and political debates without privileging any particular school of thought.

Enjeux internationaux / International Issues

Eric Bussière, Michel Dumoulin and Sylvain Schirmann

Studies in international relations, particularly historical, stem from the changing face of diplomacy over time, where the deeper forces at play, such as those once defined by Pierre Renouvin, are taken into account. Individual states, and those who define and implement their policies, are placed at the heart of global life. According to this concept, countries pursue a course of action by taking advantage of the most diverse range of tools they can rely on, such as economic or cultural resources, which act alone or interact with others.

The study of international relations grew into different fields of analysis during the 20th century, but it is now subject to a new scrutiny in this era of globalisation. This concept, which coincides with the development of neo-liberal analysis since the 1980s, reveals a new awareness about the increased number of actors NGOs and multinational companies, for example but also the large autonomy they enjoy when it comes to action.

This series aims to portray these new perspectives and their impact on current research. Without casting aside studies in international relations that focus on states, it tries to better understand the diverse range of factors that play out on the world stage and how they relate to each other from the high stakes in sport to the use of colonial memory. This series targets academics and analysts who wish to apply 20th century history to contemporary thought.

Géopolitique et résolution des conflits / Geopolitics and Conflict Resolution

Tanguy De Wilde d'Estmael

This series welcomes contributions seeking to analyse the geopolitical changes which have been such a prominent feature of the European and world arena since 1989.

At the European level, there is a particular focus on post-Cold War conflicts along with the transformation which has occurred in relations between the European Union and major powers.

At a world level, major upheavals have radically altered the ground rules for understanding conflicts and crises. They have also had far-reaching implications for the prevention, management and resolution of disputes.

In this context, the series is open to theoretical and empirical studies which critically examine the international implications and progress of specific conflicts and peace processes.

The scientific board of the «Geopolitics and Conflict Resolution» series is made up of the members of the Centre d'études des crises et des conflits internationaux of the Université catholique de Louvain (CECRI-UCL) and of the «EU-Russia» and «EU-China» Baillet Latour Chairs UCL-KUL.

Interdisciplinary Studies on Central and Eastern Europe

Nicolas Hayoz, Jens Herlth and Julia Richers

This series focuses on the political, economic and cultural changes in Eastern Europe and the former Soviet Union. It offers a platform for interdisciplinary research on this multifaceted part of the world. The focus lies mainly on current and recent developments in societies and political systems; but research on cultural and historical backgrounds has its place here, too. The range of disciplines includes political science, history, and social anthropology, but also philosophy, cultural studies, and literary criticism. The articles are written in English.

Studies in Political Transition

Klaus Bachmann

The *Studies in Political Transition* are a series dedicated to publishing interdisciplinary approaches to Political Sciences, Law, and Media and Communication. Scholars examine various forms of regime changes and their impact on social and institutional matters by analyzing the mechanisms and procedures leading to those changes. The series' editor, Professor Klaus Bachmann, is a widely known critical commentator on issues concerning the European Union as well as contemporary Polish culture.

Studies in Politics, Security and Society

Stanisław Sulowski

The book series presents the work of outstanding researchers in the area of political science and security studies. The works published will showcase the research pursued by the Polish as well as eastern European scholars on the theoretical and practical aspects of politics and security policy. Monographs as well as collective volumes shall be considered for publication.
