Poverty, Income Growth and Inequality in Paraguay During the 1990s

Spatial Aspects, Growth Determinants and Inequality Decomposition

139 pp., num. fig. and tab.
Göttingen Studies in Development Economics.
Edited by Hermann Sautter and Stephan Klasen. Vol. 23
ISBN 978-3-631-57201-6 · pb. € 27.50*

The Paraguayan economy did not suffer debt crises in the eighties and had significant growth rates in the second half of the seventies, but poverty remained a problem. Understanding the performance and spatial distribution of poverty and inequality over a period of more than ten years can shed new light on structural causes behind what seems to be a low growth – high poverty – high inequality trap in Paraguay. How did poverty and inequality change during the 1990s. Did inequality reduce income growth? What were the growth determinants and what are the main forces driving inequality changes? These are the questions being answered in this book.

Contents: Spatial distribution of poverty and inequality and their changes over a decade · Case study from Latin America · Growth determinants · Inequality decomposition · Downstream regressions · Poverty maps
