### List of tables in the appendix

**Table A45:** Descriptive Statistics: Reasons for location of plant for companies in the residual sectors, 2000 ............................................................... 302

**Table A46:** Descriptive Statistics: Reasons for location of plant for companies in the electronics sector, 2000 ............................................................ 302

**Table A47:** Descriptive Statistics: Reason for location of manufacturing plant in the auto and the electronics sector, 2000 ........................................ 302

**Table A48:** Mann-Whitney U-Test: Reason for location of manufacturing plant in the auto and the electronics sector, 2000 ........................................ 302

**Table A49:** Descriptive Statistics: Government agency's or official's assistance in locating foreign technology to license in the auto sector and in the residual sectors, 2000 ................................................................. 303

**Table A50:** Chi-Square Test: Government agency's or official's assistance in locating foreign technology to license in the auto sector and in the residual sectors, 2000 ................................................................. 303

**Table A51:** Descriptive Statistics: Government agency's or official's assistance in identifying potential foreign clients in the auto sector and in the residual sectors, 2000 ................................................................. 304

**Table A52:** Chi-Square Test: Government agency's or official's assistance in identifying potential foreign clients in the auto sector and in the residual sectors, 2000 ................................................................. 304

**Table A53:** Descriptive Statistics: Introduction of new products into the plant by licensing technology from a foreign firm in the auto sector and in the electronics sector since 1998 .................................................... 304

**Table A54:** Chi-Square Test: Introduction of new products into the plant by licensing technology from a foreign firm in the auto sector and in the electronics sector since 1998 .................................................... 305

**Table A55:** Descriptive Statistics: Introduction of new process improvements into the plant by licensing processes from a foreign firm in the auto sector and in the residual sectors since 1998 .................................................... 305

**Table A56:** Chi-Square Test: Introduction of new process improvements into the plant by licensing processes from a foreign firm in the auto sector and in the residual sectors since 1998 .................................................... 306

**Table A57:** Descriptive Statistics: New process improvement by licensing processes from foreign firms in the auto and electronics sector since 1998 .................................................... 306
List of tables in the appendix

Table A58: Chi-Square Test: New process improvement by licensing processes from foreign firms in the auto and electronics sector since 1998.................................................................307

Table A59: Descriptive Statistics: Days for consignments of a major input experienced before clearing local customs in the auto sector and the electronics sector, 2000..........................................................307

Table A60: Independent Samples T-Test: Days for consignments of a major input experienced before clearing local customs in the auto sector and the electronics sector, 2000......................................................307

Table A61: Descriptive Statistics: Approximate shares of capital from different sources in the auto sector and in the electronics sector (in percent), 2000.................................................................................308

Table A62: Independent Samples T-Test: Approximate shares of capital from different sources in the auto sector and in the electronics sector (in percent), 2000.................................................................................308

Table A63: Descriptive Statistics: Representation of members’ views to the government as one function the most important business associations perform on a regular basis for companies in the auto sector and in the electronics sector, 2000.................................309
