List of Figures

| | | |
|------|---|-----|
| 2.1 | The six perspectives of DRM | 42 |
| 2.2 | The DRM perspectives in the order of their influence on DRM systems | 45 |
| 2.3 | Basic and extended functions of DRM systems | 48 |
| 2.4 | A sample DRM system | 53 |
| 2.5 | A sample DRM process | 56 |
| 2.6 | InterTrust's DRM system | 61 |
| 3.1 | A subset of the ODRL language syntax | 75 |
| 3.2 | A simplified subset of XML schema defining ODRL | 77 |
| 3.3 | A valid language instance of the simplified ODRL schema | 78 |
| 4.1 | A simple contract life cycle with four phases | 89 |
| 4.2 | Basic states and state transitions of electronic contracts | 91 |
| 4.3 | <i>Contract right</i> versus <i>permissions</i> | 93 |
| 4.4 | Contracts and tickets – an example | 94 |
| 4.5 | Combination of tickets and direct rights processing | 97 |
| 4.6 | The abstract core objects of electronic contracts | 99 |
| 4.7 | Various usage scenarios for electronic contracts | 104 |
| 4.8 | Assigning permissions in RBAC | 106 |
| 4.9 | Application-specific data model | 110 |
| 4.10 | Example of mapping of objects instances and their attributes to software services | 112 |
| 4.11 | Composing tailored electronic contracts | 114 |
| 4.12 | Class diagram of an application-specific Contract Schema | 118 |
| 4.13 | Application-specific contract schema | 119 |
| 4.14 | Instance of an application-specific Contract Schema | 120 |
| 4.15 | The enforceability matrix | 128 |
