"*Dia-Logos. Studies in Philosophy and Social Sciences* is a peer-reviewed book series publishing valuable monographs and edited volumes on various aspects of philosophy and social sciences. The series is intended to be an interdisciplinary forum of deliberation according to our firm belief that challenges of the contemporary world require common and multilevel research. The *Dia-Logos* series does not represent a single ideology or school of thought, but it is open to different trends and various styles of reflection, trying to understand better the contemporary world. We invite the submission of manuscripts of monographs and edited volumes from academic philosophers and social scientists."
