Preface	9
1 Introduction	11
1.1 Tableau methods	11
1.2 Terminology and problems in the book	16
1.2.1 Study schedule and goals	16
1.2.2 Terminology and issues in the book	18
1.3 Notations and concepts of the set theory	24
2 Tableau system for Classical Propositional Logic	27
2.1 Introductory remarks	27
2.2 Language and semantics	27
2.3 Basic concepts of the tableau system for CPL	29
2.3.1 Tableau rules for CPL	30
2.3.2 Branches for CPL	37
2.3.3 Maximal branches	43
2.3.4 Closed and open branches	47
2.3.5 Branch consequence relation	47
2.4 Relations of semantic consequence and branch consequence	48
2.4.1 Soundness theorem	48
2.4.2 Completeness theorem	51
2.5 Tableaux for CPL vs. semantic consequence relation	54
2.6 Summary	63
3 Tableau system for Term Logic	65
3.1 Introductory remarks	65
3.2 Language and semantics	66
3.3 Basic concepts of the tableau system for TL	72

3.3.1	Tableau rules for TL	75
3.3.2	Branches for TL	79
3.3.3	Maximal branches	80
3.3.4	Closed and open branches	82
3.3.5	Relation of branch consequence	85
3.4	Tableaux for TL	86
3.5	Completeness theorem for the tableau system for TL	93
3.5.1	Estimation of cardinality of model for TL	97
4	Tableau system for modal logic S5	99
4.1	Introductory remarks	99
4.2	Language and semantics	100
4.3	Basic concepts of the tableau system for S5	104
4.3.1	Tableau rules for S5	106
4.3.2	Branches for S5	111
4.3.3	Closed and open branches	112
4.3.4	Maximal branches	113
4.3.5	Relation of branch consequence	118
4.4	Tableaux for S5	119
4.5	Theorem on the completeness of the tableau system for S5	122
5	Metatheory of tableau systems for propositional logic and term logic	153
5.1	Introductory remarks	153
5.2	Language and semantics	153
5.3	Basic concepts of the tableau system	161
5.4	Tableau rules	164
5.4.1	Branches	168
5.4.2	Closed and open branches	169
5.4.3	Maximal branches	169
5.4.4	Branch consequence relation	171
5.5	Tableaux	171
5.6	Completeness theorem	173
6	Examples of applications	189
6.1	Introductory remarks	189

6.2	Tableau system for Modal Term Logic <i>de re</i>	190
6.2.1	Language	190
6.2.2	Semantics	191
6.2.3	Tableau expression	194
6.2.4	Rules for the tableau system for logic MTL	197
6.2.5	Branches and tableaux for MTL	199
6.2.6	Theorem on the completeness of the tableau system for MTL	199
6.2.7	Estimation of cardinality of model for MTL	206
6.3	Tableau systems for modal logics	207
6.3.1	Language and semantics	207
6.3.2	Tableau expressions	207
6.3.3	Rules, branches and tableaux for modal logics	210
6.3.4	Generating of model	210
6.3.5	Completeness theorem of tableau systems for modal logics ..	212
6.4	Tableau system	213
6.5	Transition from the formalized tableaux to the standard tableaux ..	214
	Glossary	219
	Bibliography	221
	Index	223
