List of figures and tables

Figures

Figure 1: The pyramid of CSR ................................................................. 38
Figure 2: Spheres of CSR ........................................................................ 40
Figure 3: Explicit and implicit CSR compared ...................................... 41
Figure 4: A continuum between explicit and implicit CSR ................. 41
Figure 5: CSR and related concepts ..................................................... 64
Figure 6: CSR and the institutional context ......................................... 71
Figure 7: Theorization at and across various levels ............................. 90
Figure 8: Dissemination of CSR in Austria ......................................... 138
Figure 9: Significance and extent of CSR in annual reports ............... 140
Figure 10: Anchorage of CSR in annual report sections .................... 142
Figure 11: CSR and corporate governance over time ....................... 164
Figure 12: Conceptual CSR sub-discourses over time ....................... 171
Figure 13: Relative importance of conceptual CSR sub-discourses ...... 172
Figure 14: Network of conceptual CSR sub-discourses plus corporate governance ......................................................... 174
Figure 15: Reference to specific actor categories in the context of CSR . 179
Figure 16: Web of relevant actor categories ....................................... 182
Figure 17: Reference to actor categories over time ............................ 184
Figure 18: Relative importance of actor categories over time ............ 186
Figure 19: Correspondence map: Issue markers and actors ............... 189
Figure 20: Thematic embeddings of CSR issue markers .................... 193
Figure 21: Thematic embeddings of CSR issue markers over time ....... 194
Figure 22: Stabilization of thematic embeddings over time ................ 195
Figure 23: Correspondence map: Issue markers and thematic embeddings ......................................................... 197
Figure 24: Correspondence map: Issue markers, actors, and thematic embeddings ......................................................... 201
Figure 25: Cover pages of selected stand-alone annual CSR reports .... 225
Figure 26: Network of conceptual sub-discourses of several management concepts ......................................................... 226

Tables

Table 1: The three pillars of institutions ............................................... 74
Table 2: Stages of institutionalization .................................................. 80
Table 3: Dependent variable(s): Operationalization, measurement, and data sources ......................................................... 102
Table 4: Conceptual CSR sub-discourses: A structured dictionary of phrases and codes ......................................................... 103
Table 5: Control variables: Operationalization, measurement, and data sources ......................................................... 104
Table 6: Independent variables: Operationalization, measurement, and data sources ......................................................... 107
Table 7: Other variables used: Operationalization, measurement, and data sources ......................................................... 109
Table 8: Report sections: Construction of variable .................................................. 110
List of figures and tables

Table 9: Categories of actors: Construction of variable ................................................................. 112
Table 10: Categories of thematic embeddings: Construction of variable ...................................... 113
Table 11: Selected formal-descriptive variables for annual reports ............................................... 135
Table 12: Descriptive statistics ...................................................................................................... 156
Table 13: Regression models I-XI ............................................................................................... 157
Table 14: Relative probability of co-occurrence of conceptual CSR sub-discourses .................... 175
