

List of Tables

2.1.	Innovation vs. efficiency externalities	38
2.2.	Taxonomy of agglomeration economies	40
2.3.	Pecuniary externalities	43
2.4.	Innovation externalities	60
2.5.	Cumulative causation and forces of agglomeration	67
2.6.	Mechanisms of knowledge acquisition	71
2.7.	Modes of transfer of tacit and codified knowledge	74
2.8.	Transfer channels of knowledge via agents, goods and documents	75
2.9.	Network linkages and externalities	79
3.1.	Descriptives: EPO patent applications by technology field	151
3.2.	Descriptives: EPO inventors by technology field	152
3.3.	Descriptives: Change of EPO inventors and patent applications by TF	154
3.4.	Research clusters by TF and country with $RCI > 1$, 2000-2004	193
3.5.	Research clusters by TF and country with $RCI > 16$, 2000-2004	194
3.6.	Change (percentage) of research clusters (RCI) in ERA by TF	197
3.7.	Change (percentage) of research clusters (RCI) in ERA by TF	198
3.8.	Change (percentage) of research clusters (RCI) in ERA by TF	199
3.9.	Ranking of RCI: TOP20 cluster regions by technology field	205
3.10.	Ranking of RCI: TOP20 cluster regions by technology field (cont'd)	206
3.11.	Ranking of RCI: TOP20 cluster regions by technology field (cont'd)	207
3.12.	Ranking of RCI: TOP20 cluster regions by technology field (cont'd)	208
3.13.	Ranking of RCI: TOP20 cluster regions by technology field (cont'd)	209
3.14.	Co-agglomeration of research clusters and regional typology	214
4.1.	Moran's I z-scores by technology field and threshold ϑ	234
4.2.	Number of connected regions in co-patenting networks	248
4.3.	Number of inter-regional co-patenting network linkages	251
4.4.	Inter-regional linkages by technology field: structural change (1)	255
4.5.	Inter-regional linkages by technology field: structural change (2)	256
4.6.	Structure of European co-patenting networks: unique linkages	257
4.7.	Structure of network linkages between the NMS and EU-15	261
4.8.	Degree centrality ranking of TOP10 regions (1-5)	278
4.9.	Degree centrality ranking of TOP10 regions (6-10)	279
5.1.	Unconditional and conditional convergence for EU-25, EU-15 and NMS	316
5.2.	Robust OLS estimation results: national growth regressions (1)	316
5.3.	Robust OLS estimation results: national growth regressions (2)	317
5.4.	Dependent variable, covariates and controls	320
5.5.	Expected signs of explanatory variables	320

5.6.	Robust regression for EU-15 regions	324
5.7.	Robust regression for NMS	326
5.8.	Spatial regression (ML-SAR) for EU-15 regions	333
5.9.	Spatial regression (ML-SAR) for EU-15 regions (cont'd)	334
5.10.	Spatial regression (ML-SAR) for NMS regions	335
B.1.	Overview of selected empirical studies	lxxiv
B.2.	SQL database structure	lxxv
B.3.	RegPAT and the NUTS3/TL3 classification	lxxvi
B.4.	IPC - technology field concordance	lxxvii
B.5.	Distance weights and spatial lags	lxxviii
B.6.	Research clusters by TF and country with $RCI > 1$, 1990-1994	lxxix
B.7.	Research clusters by TF and country with $RCI > 16$, 1990-1994	lxxx
B.8.	Change (numbers) of research clusters (RCI) in ERA by TF	lxxxii
B.9.	Betweenness centrality ranking of TOP10 regions (1-5)	lxxxii
B.10.	Betweenness centrality ranking of TOP10 regions (6-10)	lxxxiii
B.11.	Spatial maximum likelihood regression (ML-SAR) for EU-15	lxxxiv
B.12.	Spatial maximum likelihood regression (ML-SAR) for NMS	lxxxv
