

## Our Gold Open Access Model

Peter Lang offers authors optional Gold Open Access. With Gold Open Access your research monograph will be freely available for academics to read, download, and share immediately upon publication and without any embargo period.

## What are the benefits for authors?

- **Accessibility** Your research becomes freely available as soon as it is published
- **Discoverability** Research has shown that Open Access publications gain more views, citations and downloads than publications with restricted access
- **Engagement** Increased visibility means more possibilities for public engagement and collaboration
- **Compliance** Open Access publication is increasingly required by funding bodies. Our Creative Commons license allows authors to easily comply with funder requirements.
- **Support** Gold Open Access authors receive the full benefit of our marketing and distribution services.

As a service-oriented publisher Peter Lang offers flexible solutions that suit authors' individual needs. If you prefer other Open Access models or specific types of Creative Commons licenses do not hesitate to contact us for a customized offer.
